Successfully providing technical solutions for over 16 years.

Computer Services

On-Site Service:

We provide complete on-site service with installations and repairs on your premises. For those interested, we also offer on-site training to help our clients support themselves. Receive continued support through phone or e-mail. Some common problems are resolved for current clients by a simple e-mail or phone call.

Diagnostics / Data Recovery:

Having trouble with a computer, storage disk, or network component?
Could the data be of more value than the device it is on?
Lost your DATA?
Don't worry, we can recover it!

Data loss happens to the best of us!
Disk crashes, power problems, virus damage, old fashioned human-error and even failed back-ups.

- All Media Types-
Tapes, Floppies, Zip, CD/DVDs,
Memory Cards, Hard-Drives

Networks Solutions

Structural Cabling:

Total installation of structural wiring and jacks for voice, data, audio & video. Upon construction or renovation of a building, we offer structural consultation on future infrastructure. We can also conceal the installation of additional cabling within your existing structure.

Modems, Cables, Routers, Hubs/Switches
Wireless, Internet Sharing, Hosting...

Video Surveillance:

Monitor/Record site activity to complement security, safety, and reduce liability on Construction Sites, Production/Service Plants, Retail, or Home Office. Remotely monitor your cameras through the internet.

Installation, Setup and Repair:

Your one-stop shop for system installation and repair. Make better use of existing peripherals by sharing resources. A network can allow other computers to access and print to a shared printer, or shared drive space for common projects. We offer convenience of 'On-Site' service and solutions that protect your data.
